

# Ancient Civilisations Phoenix Class Summer Terms 5 and 6 2022

In the Ancient Civilisations project, we will learn about three of the earliest civilisations in the world; ancient Sumer, ancient Egypt and the Indus Valley civilisation. We will study the ancient Sumerian and ancient Egyptian civilisation in detail, to discover how crucial factors like water sources and farming helped them to develop and thrive. We will find out about important inventions and the growth of cities. We will also study the lives of different people in society, including the roles of kings and pharaohs. We will then compare all three civilisations, before learning about the causes and consequences of each civilisation's decline. We will also consider whether or not these civilisations left a lasting legacy.

|                |   |
|----------------|---|
| History        | Features of civilisations; Ancient Sumer; Ancient Egypt; Indus Valley civilisation; Artefacts; Timelines; New inventions and technology; Everyday life; Social hierarchy; Significant leaders; End of ancient civilisations |
