

What happens when the Earth shakes? This term, we'll find out about the dangerous world of natural disasters and their deadly effects.

We'll find out about different types of rocks and sort them according to their properties; we'll investigate the Earth's layers and the location of volcanoes, discovering what causes them to erupt. We'll write powerful poetry inspired by our work on volcanoes. Using our model making skills, we'll build earthquake-proof structures and test them out.

Imaginative Learning Project focus: Geography	
English	Recounts; Poetry; Narratives; Newspaper reports
Geography	Volcanoes and earthquakes
Computing	Presenting information
D&T	Structures
History	Ancient Rome – Pompeii
Music	Composing
PE	Netball and fitness
PSHE	Celebrating difference
Science	Rocks
